Subject: Gel Hand Sanitizer Available by the Gallon

Good afternoon. As we work together to develop plans for re-entry into schools and facilities we all know how vital it will be to provide a safe/sterile environment for our students, staff, and other stakeholders.

I am taking orders for a vendor who is manufacturing hand sanitizer by the gallon. It is a GEL (not a liquid as many are mass producing now) and it meets all CDC requirements. Since it is sold in gallons it will be great for refilling dispensers in classrooms, cafeterias, buses, etc.

The price is \$42/gallon.

70% alcohol gel

Shelf life is 24 months (inventory on hand produced April 7, 2020, and manufactured daily)

Will accept POs - with 30 day pays payment terms

Delivery within 5-7 business days

Please let me know if there are any questions. I'll gladly send W-9 and other vendor information to those interested.

Respectfully,

Cerissa Neal
